

VEDA VYASA DAV PUBLIC SCHOOL, VIKASPURI, NEW DELHI

VVDAV/VP/17/08

14/07/2017

Dear Parents

Health is wealth and Prevention is better than cure.

In the wake of the upcoming season of Dengue and Chickungunya, parents and students are advised to take preventive steps to stop the mosquito borne diseases. In the school, we are taking all possible measures and would like to share a few suggestions with you :

- Eliminate black spots of mosquito breeding in your surroundings
- Don't let water collect at one place
- Keep lids of containers, water tanks closed
- Wear full sleeves shirts

You may refer to circular No. F.1/Misc./CTB/2016-17/356 dated 05.07.2017 issued by the Govt. of NCT of Delhi

For the security of their children parents are advised:

- To ensure that the mode of transport arranged by them is absolutely safe.
- Must participate in PTA meetings and discuss the safety aspects of their children
- Avoid using transport services from vehicles not having valid licence/permit
- Play the role of a vigilant observer on this sensitive subject
- Must immediately report the violations committed by the driver/staff of the school buses to the school authorities

We are concerned about the good health and safety of our students and with your cooperation we can ensure the same
